PROFESSIONAL SUMMARY

Third-year IT undergraduate at the University of Moratuwa seeking a Software Engineering internship. Built full-stack systems spanning secure payment integrations, AI-powered content pipelines, and geospatial backend services using NestJS, Spring Boot, and React/Next.js. Comfortable across the full development lifecycle - from database design to deployment - with hands-on experience in Docker and a foundation in cloud fundamentals (AWS Cloud Practitioner).

EDUCATION

University of Moratuwa B.Sc. (Hons) in Information Technology	Katubedda, Sri Lanka 2024-2028
Ananda College GCE Advanced Level: ABB GCE Ordinary Level: 9 A's	Colombo, Sri Lanka 2012-2020

PROJECTS

MediCareX: AI-Powered Pharmacy Supply Chain Platform

Technologies: ReactJS, TypeScript, NestJS, Firebase, Groq API (Llama), PayHere, jsPDF, React Native, Tailwind CSS | Group Project (5 members, industry-mentored by RootCode)

- Built the PayHere checkout module with server-side hash verification to prevent payment tampering, plus webhook handling for order status and notifications.
- Built an AI health-content pipeline (Groq/Llama) with a pharmacist approval workflow — rejections trigger automatic regeneration, keeping a human check on published content.
- Extended checkout and blog features to the React Native app via WebView, and added automated PDF invoicing with jsPDF.

Suwa Sarana: Emergency Blood Donation & Dispatch Platform

Technologies: Java 21, Spring Boot, PostgreSQL, Next.js, TypeScript, Groq API (Llama), Docker, GitHub Actions, JUnit | Personal Project

- Built a geospatial donor-matching engine using PostgreSQL's earthdistance extension, searching progressive radii (5-25km) while checking real-time donor eligibility.
- Designed a two-tier notification system — real-time alerts via Server-Sent Events, with an SMS fallback path built for offline donors — balancing delivery speed with operational cost.
- Integrated a trilingual (English/Sinhala/Tamil) AI assistant using Groq/Llama for emergency request intake, plus a medically-grounded FAQ bot with a JUnit-tested Spring Boot backend, deployed via Docker Compose with GitHub Actions CI.

TECHNICAL SKILLS

- Languages:** Java, TypeScript, JavaScript, Python, SQL, HTML/CSS
- Backend:** NestJS, Spring Boot, Node.js
- Frontend:** React, Next.js, Tailwind CSS
- Databases & Storage:** PostgreSQL, MySQL, MongoDB, Firebase (Firestore)
- DevOps & Cloud:** Docker, GitHub Actions (CI/CD), AWS Cloud Practitioner
- Testing:** JUnit, Postman
- Developer Tools:** Git, GitHub, Swagger/OpenAPI, Jira

CERTIFICATES

- AWS Cloud Practitioner Essentials – AWS [🔗](#)

EXTRACURRICULARS

- Batch Representative – Faculty of Information Technology
- Designer – IEEE RAS Student Branch
- Designer – oGT Marcom, AIESEC

LANGUAGES

- English, Sinhala (Native)
